

## Air Pressure in Isabella Air Awnings

Awning	Bar	PSI
Isabella	0.48-0.55	7-8
Ventura	0.55	8
Pascal	0.31	4.5

### IMPORTANT NOTE!

If the awning is inflated on a cool day, be aware that the pressure in the tubes will increase significantly when the temperature rises. If the pressure increases, air should be released from the awning (check the pressure).
